

Based in Burgbernheim, ALLOD sees itself as development partner for customised thermoplastic compounds for the plastics industry. Our core business is developing, producing and distributing thermoplastic elastomers (TPE).

At the earliest possible date we are offering a position as

## **Process Mechanic (m/f/d) Plastic and Rubber**

In this position you set up our machines, supervise and operate them during production, organise supplies, supervise the quality of finished products, and prepare them for shipment. In case of product changes you re-equip, maintain and service the machines.

As a specialist you teach your colleagues, support inexperienced co-workers in their daily work, and take care that all productions are carried out correctly and timely. Furthermore, you learn apprentices how to operate our machines during their apprenticeship.

What we expect from you:

- Responsibility
- Reliability
- Management skills
- Willingness to work three shifts
- Driver's license class B, forklift license welcome

What we offer:

- an innovative and dynamic environment in a growing enterprise
- a position with varied tasks and good potential for development
- demanding activities
- attractive payment

We are looking forward to receiving your application representing your skills and experience.
